PRINCETON, NEW JERSEY

Wholesale Price List

FALL 1925

WM. FLEMER'S SONS

Proprietors also of the
F. & F. NURSERIES
Springfield, N. J.

Princeton, N. J.

September 1, 1925

Dear Friends:

This is our eleventh fall price list, and gives everything we have in salable sizes in our four hundred acre nursery. It is all material of our own growing, and is of the best quality. In fact, "The Standard of Excellence in Ornamentals."

Prices are generally going to be higher but, feeling that they were high enough, or too high in most items, except shade trees, which require so much hand labor, we have either made the same price as last spring or lowered it. There are only a very few items that are higher, and the general average is lower.

In this list, we have embodied a new feature which is stating the approximate size the plant reaches at maturity, following the botanical name; and a short description emphasizing the chief qualities or characteristics of the plant. This, we think, will be a big help in placing orders, and the list can be used as a handy, pocket reference book.

We would like to fill your wants again, and invite you to come and visit us at any time. If you are too far away to drive by auto, come by the Pennsylvania Railroad, and we will meet you at the station.

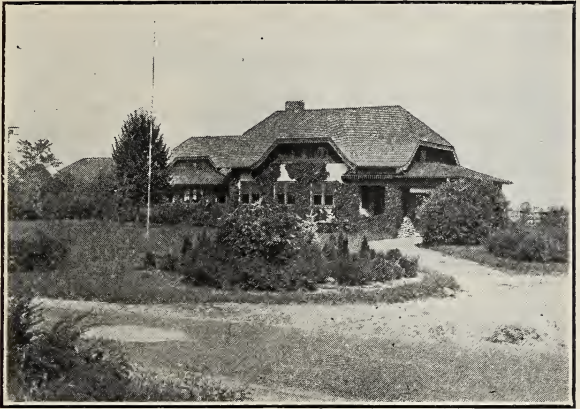

Thanking those of you who have placed orders with us in the past, and hoping that we may fill your future wants.

Yours sincerely,

PRINCETON NURSERIES,

WILLIAM FLEMER, Jr.,

Manager.

Office and grounds, Princeton Nurseries.

Members: American Association of Nurserymen.

New Jersey Nurserymen's Association.

Quotations, prices, contracts and grading are based on HORTICULTURAL STANDARDS adopted by the American Association of Nurserymen June 1923.

PRICES

Prices are as low as is consistent with the market, taking into consideration that the stock offered is of the best quality, carefully grown, with ample room for full development. Princeton grown stock must not be compared with poorly grown plants often offered. Prices are for Fall 1925.

CREDIT

To established nurserymen known to us, a credit of 60 days from date of invoice will be allowed. Cash before shipment is required from parties unknown to us and in these cases one-half the regular charge is made for boxes or bales.

Packing house and storage cellar, Princeton Nurseries. They are on our own siding which insures the minimum of exposure when loading and facilitates rapid shipment. We specialize in carload orders for which no charge is made for packing.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire, or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within a reasonable time after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

After the botanical name, in the following pages, we have embodied a new feature of giving the approximate height the plant attains at maturity; and a short description, giving the chief quality or characteristic of the plant, feeling that it would be a help to you in making up your order.

Princeton Nurseries employ no agents.

All stock offered herein is grown on our own nurseries under our own direct supervision.

PACKING

Bales and Boxes charged at cost. No packing charge is made for stock packed in full carlots. Boxes are made in the following sizes:

31 in. x 36 in.—10 ft. long.....	\$5.25
28 in. x 32 in.—10 ft. long.....	4.75
23 in. x 28 in.—10 ft. long.....	4.25

Add 50 cents for each additional 2 feet of length.
Decreases are in the same proportion, 50 cents for each 2 feet.

DECIDUOUS TREES

NOTE: The figures in italics, following each variety, indicate in feet the approximate height of that variety when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

DECIDUOUS SHRUBS

Our methods of lining out and cutting back insure the kind of full, bushy plant which really is the standard of excellence,—a young, thrifty shrub, graded liberally.

Nearly all shrubs are dug with a tree-digger which means good roots, and lots of them.

The figures in italics, following each variety, indicate in feet the approximate height of that plant when mature.

We offer the following own-grown stock:

FRENCH LILACS—NAMED VARIETIES

These are all grown from cuttings and are on their own roots, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These Named Lilacs generally grow from 6'-12' in height, depending on the variety and locality.

Two year Apples, grown at Princeton. Our fruit trees are clean, fully up to size, and true to name. We do not grow immense quantities of fruits, but have enough to supply the needs of customers who want a medium quantity to go in an assortment order. By growing them ourselves, we can stand back of them and know that we are delivering the right kind of stock.
